Nostradamus Michel De Nostradame, otherwise known as Nostradamus was born December 14, 1503. At the age of 14, Nostradame entered the University of Avignon to study medicine. After that, he traveled throughout France and Italy, treating victims of the plague. He became known for creating a "rose pill» (rich in Vitamin C) that provided some relief for patients with mild cases of the plague.

In 1550, Nostradamus believed that he could predict the future and started to publish his predictions. He planned to write 10 books, which would contain 100 predictions forecasting the next 2,000 years. In 1555 he published Les Propheties, a collection of his major, long-term predictions. Some people nowadays believe they will come true.
